Headquartered in Stafford, Virginia, QED specializes in Strategic Planning and Operations, Financial Management, Technology Services, and Facilities Information Management. Founded by a US Army Green Beret, QED is an SBA-certified SDVOSB and a proven force multiplier built on the military culture of **Q**uality, **E**xcellence, and **D**edication.

A Closer Look

Department of Homeland Security

Transportation Security Agency

QED operates the Employee Parking Assistance Program by providing program management, enrollment processing, financial services, and call center operations for transportation and parking services in support of 50,000 TSA employees at 147 airports across the United States.

National Science Foundation

Arctic Sciences Research Support Logistics Program

Since 2017, QED has supported facilities management, logistics, engineering, financial management, and strategic planning and operations for 30 arctic labs utilized by more than 25 nations and data sharing with the DoD and the intelligence community.

Department of Labor

Employment & Training Administration Job Corps

QED employs research/data analysts to centralize and standardize policy and records management for 300,000 students at 121 centers across all six job corps reasons.

Defense Technology Security Administration

Top Secret Facility Clearance – QED provides courier delivery services of TS/SCI material between the Pentagon, DoD, Department of State, Department of Commerce, and 20 agencies and commands within the National Capital Region.

Department of Defense

Exercise Trident Spectre

QED provided realistic battlefield network-based infrastructure support to Trident Spectre and more than 500 exercise participants

Department of Justice

Criminal Division

QED provided 25 HSPD-12, NACI-screened employees to provide 24/7 security operations, access control, and escort services for 300+ contractors during a 2-year renovation project of 2 FBI facilities in Washington. DC.

Department of Treasury

Bureau of Engraving & Printing

QED provides health and OH&S, industrial hygiene, risk assessments, site inspections, regulatory compliance, employee training, call center operations, and incident investigations in support of the 100-acre Western Currency Facility in Fort Worth, Texas.

National Science Foundation

Directorate for Geosciences

QED guided NSF GEO's efforts to evaluate existing practices to support future implementation of a comprehensive Knowledge Management program

Department of Homeland Security

Real Estate Management Division

QED provides data collection, data entry, validation, reporting, and Real Estate Management System implementation support to enable improved financial management process, resolve issues related to the lease reporting process, and provide accurate information for day-to-day management and financial reporting.

US Air Force

Air Force Material Command

QED procured and installed an alarm and Intrusion Detection System and Access Control System to ensure a USAF facility was alarmed and met the requirements of the ICD 705 and SCIF construction

Drug Enforcement Agency

QED completed more than 15 projects to support the DEA's Mobile Command Vehicles. This work involved the procurement, specification, installation, repair, testing, and training on various pieces of equipment; project management and administrative support; and onsite engineering support.

US Air Force

Air Force Material Command

QED engineered, furnished, installed, and tested an outside plant, leased single mode fiber optic cable per ANSI standards.
